

Maths Homework activities for Year 1 – HT6

The children need to ‘master’ the age expectations for their year group in Maths by the end of the summer term. This means making sure they have a deep, long term, secure understanding of the Maths they have learnt so they are able to apply it in different contexts. Occasionally your child may be given extra homework to reinforce an area of Maths they need more practise with.

I can count up to 100 and talk about place value.

Count.  
Write in numbers.

1  

2  

3  

We will continue to discuss place value of numbers up to 100. The picture above shows examples of tens and ones together to make two digit numbers.

Compare the number of coins.

Ruby

tens	ones
7	5

75 = 7 tens and 5 ones

Sam

tens	ones
6	3

63 = 6 tens and 3 ones

Charles

tens	ones
6	9

69 = 6 tens and 9 ones

I can use and recognise fractions (halves/quarters).

This half term, we will be looking at halves and quarters of shapes and quantities. We will be working practically to solve these problems.

Guided Practice

1 Which of these show halves?

Each shape shows one whole.

1 Which of these show quarters?

Each shape shows one whole.

How do we group the cupcakes equally?

I can recognise coins and notes.

We will be looking at a range of coins and notes and the values that they hold. Please give coins to your children to buy small items while out shopping!

1 Which of these are 50 pence coins?

I can tell the time on the hour and half past the hour.

Please encourage your child to talk about what they do at certain times during their day and evening (e.g. 7 o'clock – get out of bed).

			
half past 4		half past 6	half past 7
			
	half past 9		half past 11

We will also be measuring volume, capacity and mass in Maths lessons through-out the half term.
