

Dear Parents/Carers,

This half-term, we have started our new topic '**Titanic**' and as a piece of homework, we are asking the children to create their own 3D model of the Titanic boat. This can be made out of anything you have available, for example: paper, card, clay, Lego etc. Below are some examples for inspiration! Once completed, the children can bring their models into school the week beginning the 24<sup>th</sup> February. This means you will have all of half term to complete this too!

To finish our topic, we will see if any of the homemade models are 'unsinkable' like the Titanic was claimed to be! It might be worth bearing this in mind when making your model and thinking about the materials you should use. However, if you wish to, you can choose to opt out of testing this so you can take your model home in one piece!

Happy model-making!

Year 5 Team 😊
