Rainforests

Research a rainforest explorer or scientist

Choose someone who has helped us understand or protect rainforests. Examples:

- **Jane Goodall** – studied chimpanzees
- **Sir David Attenborough** – documented rainforest wildlife
- **Henry Walter Bates** – discovered mimicry in insects
- **Francis Hallé** – rainforest botanist

Present your findings in any way you like: poster, speech, PowerPoint or notes.

Create a rainforest travel brochure

Persuade people to visit a rainforest. Include pictures, a map, weather, animals, plants and exciting facts.

Rainforest language challenge

Learn a few words from a rainforest-region language (Tupi, Lingala or Tok Pisin). Write your name or a short message.

Make a rainforest feast menu

Create a menu using rainforest foods like cassava, plantain, fish, papaya, mango and cocoa. Decorate your menu creatively.

Design your own rainforest pot

Draw or make a pot decorated with rainforest animals, plants or patterns. You could include a rainforest story or creature on your pot.
